World Academy of Dental Education

Learn the full spectrum of clinical applications of PRF/CGF

Utilizing growth factors for GBR, Sinus Aug. & Perio Procedures

Dr. Paul Jang | Course Speaker

Diplomate, American Board of Periodontology
Clinical assistant professor, Dept of graduate periodontics and implant surgery, Faculty of Dentistry, University of British Columbia, Canada

About this Course

This comprehensive 1-day hands-on course will cover both the science and clinical application of **PRF** (platelet rich fibrin) and the latest protocol, **CGF** (concentrated growth factors) in clinical practice. The benefits of utilizing patient's own blood to obtain PRF and CGF in order to enhance success in implant, bone and soft tissue grafting procedures will be discussed. Participants will learn the **full spectrum of clinical application of PRF/CGF in dentistry** including, socket preservation, lateral ridge augmentation, sinus lift and periodontal plastic surgery. Participants will receive hands-on training on simplified venipuncture technique and fabrication of PRF and CGF for clinical application.

During this course, our attendees will:

- Comfortably perform venipuncture
- Utilize patient's blood to fabricate fibrin clot and fibrin glue
- Learn how to make 'sticky bone' for ridge augmentation and socket preservation
- Utilize fibrin clot and fibrin glue to enhance healing and minimize complications
- Learn protocol for facial cosmetic application of CGF: liquid phase CGF
- Learn the full spectrum of clinical application of PRF and CGF including management of surgical flap, extraction sockets, sinus lift, bone and soft tissue grafting.

About Dr. Jang

Dr. Jang received his dental degree from Boston University with Cum Laude. He then completed residency in Periodontics and Implant surgery at the University of Illinois at Chicago where he received numerous awards for excellence in clinical work and research. Following graduation, he continued to obtain Fellowship with the Royal College of Dentists of Canada and became a Diplomate of the American Board of Periodontology. He is the past President of the British Columbia society of periodontists (2013-2014). He is a reviewer for the Journal of Periodontology and serves as the Clinical Assistant professor at the University of British Columbia in the Dept. of Graduate Periodontics where he is involved in surgical training of residents. He is the founder (since 2006) and director of the Northwest Dental Study Club with over 100 member dentists. He trains local and international dentists in his state-of-the-art teaching facility with hands-on periodontal and implant surgical procedures including basic/advanced bone regeneration and soft tissue grafting techniques. Dr. Jang has lectured numerous occasions at both local and international levels on the topics of basic implant surgery, All-on-Four rehabilitation and advanced sinus grafting.
